Accounting Reports:

Operator Report:

- We will be having some warranty work done by Triple Point for a leak near the shed that holds the main blower for the newly installed aeration system. With the recent power outage during the week of the 11th, the power to the blower was tripped and the main line retracked due to cold weather and cracked the transition joint. The blower is not set to automatically come back on once power is restored. Triple Point has shipped us a part we can use as a temporary fix and they are checking with their engineers to see what the best permanent repair would be.
- We have had zero callouts after hours, all have been during the regular work day. Maintenance is completed to all pits. Reed now has staff doing other projects like insulation and dry wall of the blower shed, getting equipment ready for winter plowing, taking inventory of tools, parts, supplies and back up replacement parts. Also trying to rotate out all old inventory we do not use anymore.
- The new control panels for the Lift Stations have arrived and should beginning installation the first part of December.
